

RESEARCH INSTRUMENT

Name of Participants/Interviewer:

Place:

Time of Interview:

Researcher: This interview aims to explore your lived experiences in participating in continuous professional development programs. To ensure the accuracy of gathered information, the session will be audio recorded and supported by note-taking during the interview. The interview will include open-ended questions, along with follow up questions when necessary, to encourage more detailed and meaningful responses regarding your experiences. You are encouraged to answer at your own pace and may ask for clarification when needed through the interview. Lastly, all responses will be processed anonymously and with strict confidentiality to protect each participant's privacy.

Questions:

1. How do you describe your experience with participating in a Continuous Professional Development Program?
2. Can you describe your understanding of Continuous Professional Development and its importance in your role as a Radiologic Technologist?
3. What types of CPD activities have you participated in? Please provide specific examples.
4. Can you describe any specific instances where CPD has improved your skills or knowledge?
5. How do you apply the knowledge and skills gained from CPD activities in your daily practice? Can you provide examples?
6. What challenges have you faced in pursuing CPD opportunities?
7. How did you cope with these challenges?
8. What recommendation can you make based on your experiences and participation in the CPD Program?
